INTERSHIPS AND PROJECTS

Projects	<p>Development of Alumni Portal (Duration November 2022 - May 2023) The Alumni Portal is a project that helps a certain university or college manages its alumni data. This project has 2 sides of users UI (user interface), which are the admin side and the alumnas side. The admin side can manage all the list of job posted, alumni list, events, forum topics, and the gallery. The alumni site can create an account to be verified by admin , post a job opportunity, create a forum topic and join to other forums, commit to participate in an upcoming. Skills used - Python,Django</p> <p>E-Library Management System (Duration January 2023 - January 2023) This Library Management System Project has been developed using PHP language with MySQL Database, JavaScript and Bootstrap 5 library. Under this Library Management System there are main two user, one is Admin or Librarian and Other is Student or User who will borrowed book from Library. In this Library Management System Admin or Librarian can maintain all data like add or manage category, authors, books, issued book returned book etc. Here Admin or Librarian is the key role in the management of this Library Management System Online.</p> <p>Responsive User login system with admin panel (Duration March 2023 - March 2023) The Login and Registration System In PHP is a simple mini project. The project contains the user side and admin side. The user can login to the system if he or she already have an account. Otherwise, you have to fill the registration form first , then login into the system. .Admin can manage all registered users. Admin can update the user information and delete the user and admin can change their own password. Skills used - Core PHP,Html5,CSS,Javascript,Bootstrap</p> <p>Personal Portfolio Website (Duration March 2023 - April 2023) I recently completed a project of developing my personal portfolio website using ReactJS. My website showcases my skills, experience, and achievements. The website includes information about my education, professional experience, and projects that I have worked on.</p>
